

Detect Deception. Enforce Compliance. Build Trust.

Continuous, AI-Powered Dark Pattern Detection
& Compliance Assurance for Modern Enterprises.

The Challenge (What IRDAI & CCPA Mandate)

In today's digital landscape, the IRDAI and the Central Consumer Protection Authority (CCPA) are actively cracking down on deceptive design practices that distort consumer decision-making. Insurers and BFSI institutions face severe regulatory penalties, mandatory UI rollbacks, and brand trust erosion for non-compliant digital journeys:

1. **Pre-Ticked Add-ons & Bundling:** Automatically pre-selecting riders, deductibles, or ancillary covers without explicit consent.
2. **Forced Action & Hidden Traps:** Mandating unrelated personal data collection or forced account sign-ups just to view basic policy quotes.
3. **False Urgency & Scarcity:** Generating artificial countdown timers or fake inventory claims to rush purchasing decisions.
4. **Disguised Ads & Bait-and-Switch:** Blending sponsored links into organic advice or altering terms midway through checkout.
5. **Confirm-Shaming & Obstruction:** Employing guilt-inducing language on opt-outs and engineering multi-step friction on cancellation journeys.

The solution

LucidFlow™ transforms complex regulatory guidelines into a continuous, automated compliance framework. Our platform continuously monitors web and mobile user flows to identify, categorize, and flag deceptive patterns before regulators do. Combining intelligent heuristic scanning, visual AI, and SBA's expert security & compliance advisory, LucidFlow gives your team end-to-end visibility, automated forensic evidence, and clear remediation guidance across every digital asset.

Key capabilities

Automated Scan Engine & Journey Mapping:

- Multi-step customer journey emulation across web portals, quote calculators, and mobile flows.
- Comprehensive heuristic detection & remediation plan covering all 13+ IRDAI & CCPA recognized dark pattern categories.
- Automated high-resolution screenshot captures, and risk severity scoring (Critical, High, Medium, Low) mapped directly to regulatory exposure.

AI-Powered Detection & Verification:

- NLP engine for detecting disguised copy, forced consent, ambiguous disclaimers, and confirm-shaming.
- Visual contrast and font-hierarchy analysis to expose hidden costs, buried terms, and pre-selected add-ons.

Corrective Action Plan (CAP) :

- Standardized, ready-to-use Corrective Action Plan (CAP) included directly in the final report.
- Clear step-by-step guidance to document remediation milestones for internal audit and risk committees.

Flexible Engagement Models:

- **Plan 1: One-Time Project:** Fixed-scope audit (Baseline + Verification scans) with reporting & advisory.
- **Plan 2: Annual SaaS (Cloud):** 365-day continuous self-service monitoring for root & all sub-domains.
- **Plan 3: Annual Enterprise (On-Prem):** Self-service deployment in your private cloud for data residency.

Professional Services (On-Demand Advisory)

- **IRDAI-Ready Governance:** Regulatory dossiers and board compliance scorecards.
- **Developer & CI/CD Sync:** Automated Jira, DevOps, and GitHub ticket integration.
- **Remediation Advisory:** Direct UX/engineering support for code-level fixes.
- **Managed Compliance:** Quarterly audits and independent validation.

LucidFlow™ : Every Click Flawless. Every Journey Compliant.

Eliminate digital compliance blind spots and protect your brand reputation with LucidFlow. Take the proactive step toward seamless IRDAI compliance today.
